

Prague, 25 May 2022

Invitation to Pavlo Shydlovskiy to attend the 28th Annual Meeting of the European Association of Archaeologists in Budapest, Hungary, 31 August - 3 September 2022

Pavlo Shydlovskiy is welcome to participate at the 28th Annual Meeting of the European Association of Archaeologists in Budapest, Hungary, 31 August - 3 September, and to present contribution

2503. Internal and external structures of the Upper Palaeolithic Dwelling no.4 from Mezhyrich settlement (Ukraine)

We expect to host approx. 2500 delegates and hold 200 sessions on wide-ranging topics, divided into six broad themes:

1. Archaeologists and Archaeology Here and Now
2. [Re]integration
3. The Carpathian Basin: Integration, Mobility and Diversity
4. Polis, Empire, League and Beyond – Living in Interconnected Societies
5. Climate Change and Socioenvironmental Perspectives
6. A Decade after the 'Third Science Revolution in Archaeology'

The EAA will not cover registration, travel and accommodation costs. Any assistance to Pavlo Shydlovskiy in attending the EAA Annual Meeting will be highly appreciated.

Session: #403

Theme: 5. Climate Change and Socioenvironmental Perspectives

Session format: Regular session

Domestication of Space: Internal and External Dwelling Structures in Middle and Upper Palaeolithic Sites

The structuration of the settlement area is a bright feature of Middle and Upper Palaeolithic campsites. Different occupation characteristics can be identified by the functional specifications of distinct archaeological structures, in relation to the palaeoecological framework and the dynamics of settlement development over time.

Dwellings and constructional materials, pits (storage or dumping), hearths, activity areas, such as workshops or butchering zones, demonstrate the spatial arrangement of residential practices in different sectors. Their study requires interdisciplinary research to establish their chronological and functional relationships and the insertion of the settlement in the surface microrelief and local landscape features. The analysis of separate structures with functional peculiarities from Middle and Upper Palaeolithic campsites allows to reconstruct the interaction of inhabitants with the surrounding landscape, to understand the links between different types of activity inside the settlement area, to establish functional and seasonal characteristics of occupation and to identify behavioural features of Palaeolithic settlers.

The session gives the opportunity to connect new researches on dwelling structures from Middle and Upper Palaeolithic sites through Europe, and interpretative studies of spatial behaviour, in relation with specific landscape, palaeo-ecological and cultural features.

Keywords: Palaeolithic, dwelling, structures

Organisers:

Stéphane PEAN, Muséum national d'Histoire naturelle, UMR 7194 HNHP (France)

Pavlo Shydlovskiy, Taras Shevchenko National University of Kyiv (Ukraine)

Zsolt Mester, Eötvös Loránd Tudományegyetem BTK Régészettudományi Intézet (Hungary)

The Call for contributions for the [28th EAA Annual Meeting in Budapest](https://e-a-a.org) (31 August - 3 September 2022) is open until 10 February 2022.

ANNUAL MEETING ATTENDANCE CONFIRMATION

This is to confirm that the below person participated at the 28th Annual Meeting of the European Association of Archaeologists (EAA) in Budapest, Hungary, 31 August - 3 September 2022, and presented the below specified contribution.

Full name:

PAVLO SHYDLOVSKYI

Contribution title:

INTERNAL AND EXTERNAL STRUCTURES OF THE UPPER PALAEOLITHIC DWELLING NO.4 FROM MEZHRYCH SETTLEMENT (UKRAINE)

Contribution format:

ORAL PRESENTATION

Contribution presented in session:

DOMESTICATION OF SPACE: INTERNAL AND EXTERNAL DWELLING STRUCTURES IN MIDDLE AND UPPER PALAEOLITHIC SITES [PAM]

European
Association of
Archaeologists

Signature:

Date: 10 September 2022

Sylvie Květinová, EAA Senior Manager
